Startups aus dem Bereich Energie stellen sich vor:

LEDCITY

LEDcity

An aerial night view of a city, likely Zurich, showing a dense cluster of modern buildings with many windows illuminated from within. The streets are lit up, and the overall scene is dominated by blue and white light. The word 'LEDcity' is overlaid in a large, white, outlined font in the upper left corner.

Saving energy through automatization

State of the art Provided by the market

Central and sluggish systems

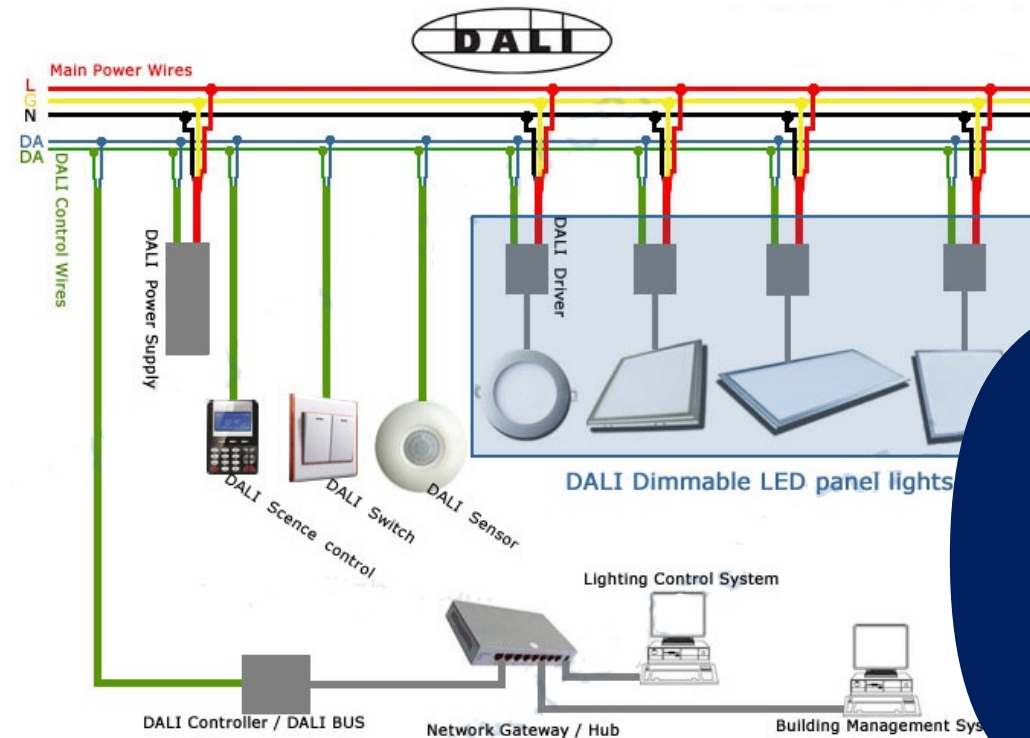

Complex to install

High energy consumption

High installing costs

Light source not replaceable

High maintenance costs

6
Points of pain

Solution

Autonomous led tube

Decentral system

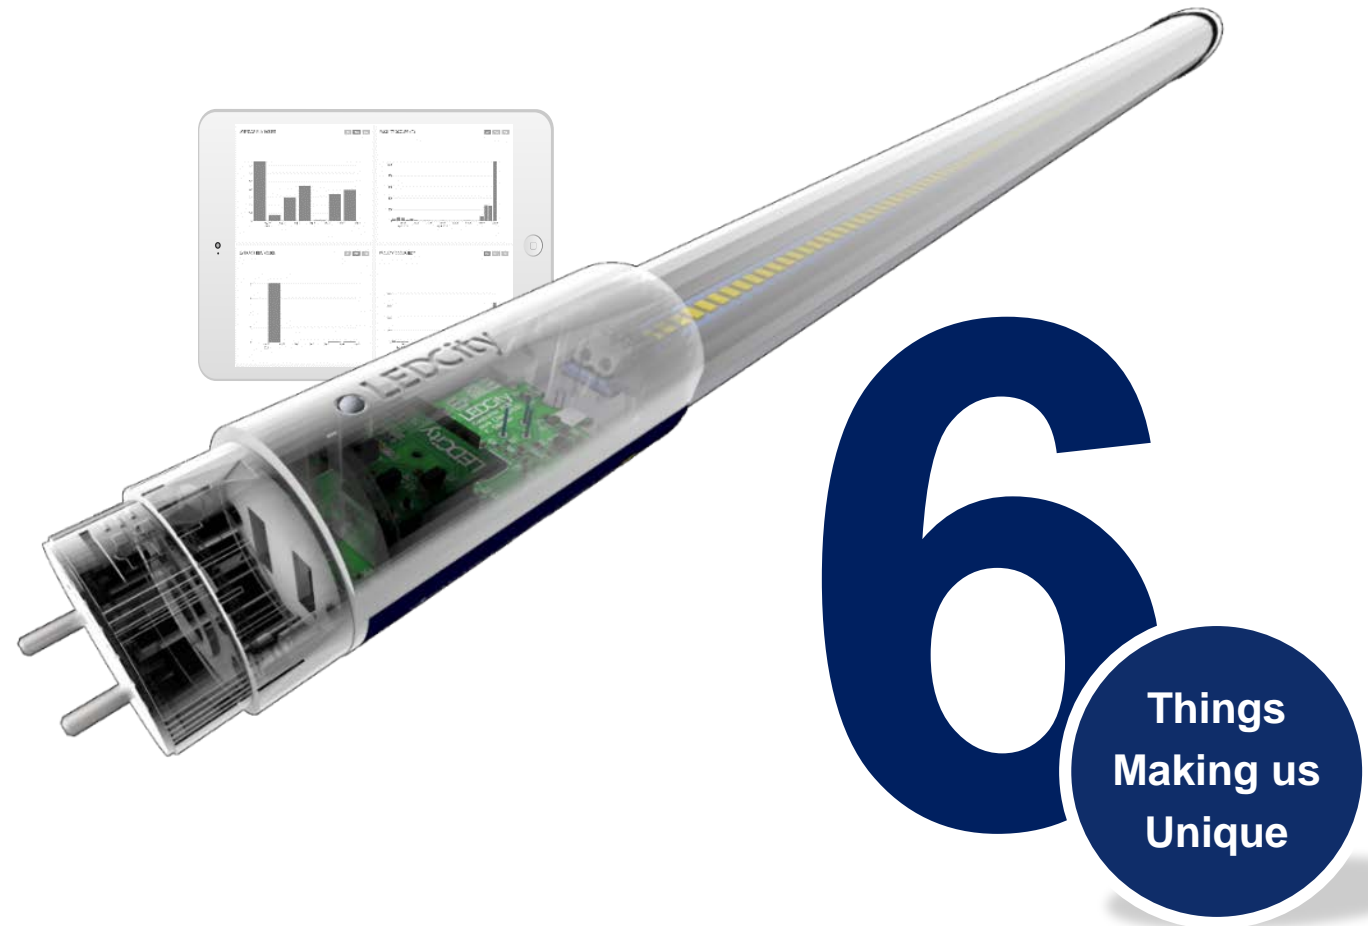

Everything integrated

90 % Energy savings

Modular & quick to install

Self decision maker
